

The amount of waste generated from food production, storage, processing, and consumption in all food courts is measured and tracked. KKU categorized the wastes into 2 types: 1. Food waste and 2. Recyclable waste. By source of waste, there are 2 types of sources: 1. Waste generated by personnel within the university 2. Waste generated by services that provide for outside such as Bayasita Hotel, Srinagarind Hospital Nutrition Department Faculty of Medicine, as shown in the following graphs:

		Food Waste	Recycling
2021	University exclude external service	88.00	NA
	Faculty of Medicine	NA	NA
	Hospital	NA	NA
	University Hotel	NA	NA
	Total	88.00	

		Food Waste	Recycling
2022	University exclude external service	61.34	2.20
	Faculty of Medicine	36.00	NA
	Hospital	15.20	7.39
	University Hotel	3.42	1.72
	Total	127.26	

In 2022 Total food waste and recycling is 127.26 (metric ton)
