

Food Waste Management:

Asset Management Center of KKU has assigned cleaning staff to collect food scraps from the containers and record the weight of food each day. In the evenings every day, an outside operator takes these food waste to be process as pet food.

Recyclable Waste Management:

Asset Management Center of KKU has set up recycling bins placed in every food court. When the cleaning staff collects recyclable waste such as plastic bottles, the waste will be separated and collected in storage for sale each month. Asset Management Center will sell recyclable waste to outside operators for the income of the university.

Waste management in the Faculty of Medicine and Hospital:

Faculty of Medicine KKU designated waste disposal points and waste sorting area in the hospital. Staff is trained to be able to separate waste properly. There is a waste recycling program aim to add value and improve waste management in accordance with the environmental, health, and safety management policy. Garbage disposal operated by Khon Kaen Municipality to dispose of waste once a day by garbage compression truck. Nutrition Department Srinagarind Hospital manages food waste from patient services by making a record of the food waste every month and auction of food waste to outside operators.
